

## Interactive Media Designer

Uhlig LLC is offering an exciting opportunity for talented and motivated individuals interested in providing demonstrated interactive media design experience.

### Job Description:

Successful candidates will work with managers and developers to design and develop HTML/CSS look and feel for both internal and external web-based applications for both new and existing projects. The interactive media designer will create clickable prototypes of new systems based on documentation and specification and create CSS skins for template-based websites.

Additionally, the successful candidate will:

- ✦ Design client-compatible HTML for email campaigns.
- ✦ Receive complex design layouts in .psd format and use Photoshop to extract necessary image assets and reproduce them as pixel-perfect CSS-based layouts.
- ✦ Create interactive elements on a web site using JavaScript libraries.
- ✦ Develop and design interfaces, interactions, and navigation.
- ✦ Test, debug and ensure web page elements are functional across different browser types and mobile devices.
- ✦ Implement web design parameters, style guides and visual standards, including but not limited to, graphics, icons, resolution, graphics, color schemes, etc.
- ✦ Provide ongoing design maintenance of the applications, including style sheet offerings and complete look and feel redesigns.
- ✦ Keep abreast of internet usability standards, technologies, web design parameters, style guides and visual standards.

Uhlig LLC is a fast-growing, advanced-technology publishing company specializing in content-rich documents and periodicals that are delivered in web, print and electronic forms. Based on its proprietary, Internet-based software platforms, Uhlig LLC provides products and services to customers throughout North America, and is a national leader in the field of cross-media, variable-content publishing. Ambitious, imaginative individuals who embrace change and enjoy expanding the boundaries of traditional design and communication will thrive in our fast-paced, innovation-centered culture.

### Experience:

Candidates must possess a bachelor's degree with emphasis in design or have equivalent work experience in a related field and excellent references. Candidates must be proficient in Adobe Creative Suite 4 and have 3-5 years experience working in Adobe Creative Suite applications, especially Photoshop, Illustrator, Dreamweaver and Flash. Candidates also must demonstrate creative abilities through online portfolios and webpage designs. Additional experience considerations include a strong knowledge of web standards with a focus on cross-browser standards; server-side integration, particularly with ColdFusion; Flash/Flex/ActionScript, XML; and jQuery and Prototype JS libraries.

We provide a culture that fosters business and professional growth. We work in a modern, high-technology office environment and offer generous opportunities for continuing work-related education and career advancement. EOE
